

Remington Industries SJE00W 300V Portable Cord is a heavy duty multi-conductor cable suitable for delivering power to tools, equipment, appliances, and other portable machinery for indoor & outdoor use. The flexible color-coded TPE-insulated wires and the black TPE outer jacket make for a robust cable that resists oils, solvents, moisture, sunlight (UV), and many other types of weathering. This thermoplastic elastomer insulation provides superior flexibility at low temperatures compared to other similar cables. The cable is even suitable for immersion in water if it is properly sealed & terminated. This durable cord is available in four wire sizes from 12 to 18 AWG, as well as with two, three, or four conductors. Remington Industries offers 7 different cable lengths for your convenience.
